

1. A protective barrier cover for use with a substantially semi-circular barrier
2 post, said cover comprising:
a substantially semi-circular body having first and second elongated planar and
4 semi-circular surfaces;
the first and second semi-circular surfaces having top, bottom, and side edges;
6 the top and side edges of the first and second semi-circular surfaces being
adjoined and separated by a distance that defines an interior cavity; and
8 the interior cavity dimensioned to receive the semi-circular guard post in slip fit
engagement.

2. The protective cover of claim 1 wherein at least one of said elongated
2 planar and semi-circular surfaces is disposed with an advertising display.

3. The protective cover of claim 1 wherein said semi-circular body is
2 disposed with a fastening means for securing to a fixed surface.

4. The barrier cover of claim 2 wherein the advertising display is a message
2 of stenciled letters.

5. The barrier cover of claim 2 wherein the advertising display is an
2 electrical/electronic circuit comprising one or more lighting elements configured to
display a message or image.
